Installation Instructions Windows:

Before you start, make sure you have write access to the installation location folder and that you have Administrator privileges.

Date: January 2022

1. Make sure no one is using ArcGIS Desktop 10.8.1.
2. Extract the DT-1081-HF-000005640C.msp from the ZIP file to a local folder.
3. Double click DT-1081-HF-000005640C.msp to start the install process.
4. When Setup starts, follow the instructions on your screen.

Uninstalling this Hot Fix:

To uninstall this hot fix on Windows, open the Windows Control Panel and navigate to installed programs. Make sure that "View installed updates" (upper left side of the Programs and Features dialog) is active. Select HF-000005640 from the programs list and click Uninstall to remove the hot fix.

Getting help:

Please refer to the Hot Fix Name when contacting Esri Technical Support. If you are in the United States, please contact Esri Technical Support at 1-888-377-4575, if you have any difficulty installing this Hot Fix. Sites outside of the United States, please contact your local [Esri software distributor](#).
